

BOOK-4: ENERGY PERFORMANCE ASSESSMENT FOR EQUIPMENT AND UTILITY SYSTEMS

Table of Contents

Chapter

1	BOILERS	
1.1	Introduction	01
1.2	Purpose of the Performance Test	01
1.3	Performance Terms and Definitions	01
1.4	Scope	01
1.5	Reference Standards	02
1.6	The Direct Method Testing	02
1.7	The Indirect Method Testing	05
1.8	Example: Boiler Efficiency Calculation	13
1.9	Factors Affecting Boiler Performance	22
1.10	Data Collection Format for Boiler Performance Assessment	23
1.11	Boiler Terminology	24
2	FURNACES	
2.1	Industrial Heating Furnaces	31
2.2	Purpose of the Performance Test	31
2.3	Performance Terms and Definitions	32
2.4	Reference Standards	32
2.5	Furnace Efficiency Testing Method	32
2.6	Data Collection Format for Furnace Performance Assessment	40
2.7	Useful Data	41

3 COGENERATION, TURBINES (GAS, STEAM)

3.1	Introduction	45
3.2	Purpose of the Performance Test	45
3.3	Performance Terms and Definitions	45
3.4	Reference Standards	46
3.5	Field Testing Procedure	46
3.6	Example	50

4 HEAT EXCHANGERS

4.1	Introduction	55
4.2	Purpose of the Performance Test	55
4.3	Performance Terms and Definitions	55
4.4	Methodology of Heat Exchanger Performance Assessment	56

5 ELECTRIC MOTORS AND VARIABLE SPEED DRIVES

5.1	Introduction	73
5.2	Performance Terms and Definitions	73
5.3	Efficiency Testing	74
5.4	Determining Motor Loading	77
5.5	Performance Evaluation of Rewound Motors	79
5.6	Format for Data Collection	80
5.7	Application of Variable Speed Drives (VSD)	81

6 FANS AND BLOWERS

6.1	Introduction	87
6.2	Purpose of the Performance Test	87
6.3	Performance Terms and Definitions	87

6.4	Scope	87
6.5	Reference Standards	87
6.6	Field Testing	88
6.7	Example: Performance Test Report on Cooling Air Fan	95
6.8	Factors That Could Affect Performance	97

7 WATER PUMPS

7.1	Introduction	99
7.2	Purpose of the Performance Test	99
7.3	Performance Terms and Definitions	99
7.4	Field Testing for Determination of Pump Efficiency	100
7.5	Determining the System resistance and Duty point	102

8 COMPRESSORS

8.1	Introduction	107
8.2	Purpose of the Performance Test	107
8.3	Performance Terms and Definition	107
8.4	Field Testing	107
8.5	Calculation Procedure for Nozzle Method	109
8.6	Example	110
8.7	Assessment of Specific Power Requirement	111
8.8	Measurement of FAD by Pump Up Method	111

9 HVAC SYSTEMS

9.1	Introduction	115
9.2	Purpose of the Performance Test	115
9.3	Performance Terms and Definitions	115
9.4	Preparatory for Measurements	115

9.5	Procedure	116
9.6	Measurements to be Recorded During the Test	118
9.7	Example	118

10 LIGHTING SYSTEMS

10.1	Introduction	123
10.2	Purpose of the Performance Test	123
10.3	Performance Terms and Definitions	123
10.4	Preparation (before Measurements)	124
10.5	Procedure for Assessment of Lighting Systems	125
10.6	Example of ILER Calculation	128
10.7	Areas for Improvement	128
10.8	Other Useful Information	129

11 FINANCIAL ANALYSIS

11.1	Introduction	133
11.2	Fixed and Variable Costs	133
11.3	Interest Charges	135
11.4	Simple Payback Period	136
11.5	Discounted Cash Flow Methods	137
11.6	Factors Affecting Analysis	143

12 APPLICATION OF NON-CONVENTIONAL & RENEWABLE ENERGY SOURCES

12.1	Concept of Renewable Energy	147
12.2	Solar Energy	147
12.3	Wind Energy	151
12.4	Bio Energy	154

12.5	Hydro Energy	158
12.6	Tidal and Ocean Energy	159

13 WASTE MINIMISATION AND RESOURCE CONSERVATION

13.1	Introduction	163
13.2	Classification of Waste Minimisation (WM) Techniques	164
13.3	Waste Minimisation Methodology	165
13.4	Case Study	174
