

# ENERGY MANAGEMENT POLICY

IFFCO a market leader in production and marketing of fertilizer recognizes the importance of energy conservation in every day business and activities. We are committed to develop and maintain a comprehensive energy conservation and management programme which will ensure our continuous ability to grow and serve the farming community through:

- Improved capacity utilization.
- Bench marking our specific energy consumption with the best norms in the industry.
- Monitoring of energy consumption through energy audits to identify the areas for improvements.
- Up gradation of equipments, process and technology for optimization of energy consumption.
- Promoting energy awareness among employees.
- Encouraging employee participation in energy conservation.

(K.L. Singh)

Chief Executive Officer
