

ENERGY - POLICY

We, at Bokaro Steel, are committed to continuously improve and excel our Energy performance in all our activities and services so as to make it environmentally sustainable for future generations.

To meet this goal, we will strive for

- ☛ **Energy efficient production and processing of Steel.**
- ☛ **Nurturing energy efficient and environmentally friendly designs and technologies for all future acquisitions wherever practicable.**
- ☛ **Involvement of employees and general public for energy conservation through awareness and recognition.**
- ☛ **Bench marks that drive us to monitor and improve energy performance through periodic reviews.**
- ☛ **Continuous reduction in our energy consumption year after year by Energy Audit and endeavor to be world leader.**
- ☛ **Promoting use of renewable energy resources wherever feasible and elimination of wastages.**
