

VASAVADATTA CEMENT

ENERGY POLICY

We are committed to Conserve Energy in Cement manufacturing, Power generation process and related activities by efficient use to preserve Environment and to save Natural resources.

OBJECTIVES

- Awareness and training to employees for Energy Conservation with philosophy "Energy Saved is Energy Produced"
- Periodic Energy Audit, Continuous Monitoring, Review of Targets and Bench Marks for energy consumption.
- Identify the potential areas and equipments for Energy Conservation.
- Implement, Innovative ideas/modifications, improvements and upgradation of the equipments.
- Process Optimization and Diagnostic Studies to maintain high productivity and capacity utilization to minimize specific energy consumption.
- Utilization of cheaper and other renewable energy sources.
- Explore utilization of waste and hazardous material as alternate source of Thermal energy.
- Explore the feasibility of using modern technology to utilize the waste heat to maximum extent.
