

ENERGY POLICY

We, the employees of Hindalco Industries Ltd. are committed to conserve Energy judiciously in all our activities, products and services thus transforming energy conservation into a strategic business goal. To conserve energy we believe in technological advancements by improving the skill and knowledge of our employees for sustainable development.

To achieve excellence in energy conservation, we will:

- Reduce specific energy consumption in all our operations and activities.
- Produce high purity metal with high conductivity to achieve minimum power losses.
- Conserve fossil fuels through enhanced use of renewable energy/recovered waste energy.
- Adopt energy efficient technologies/equipment for all new projects.
- Replace old energy inefficient technology/equipment with the latest energy efficient state of art technology/equipment continually.
- Ensure control over energy consumption and sustain it by periodic management reviews, motivation to employees.
