

Energy Policy

At IFFCO Kalol, optimum utilisation of energy and the total energy management are the part of corporate mission and IFFCO is fully committed to reduce the specific energy consumption in the production of nitrogenous fertiliser through :-

- Conducting in-house energy audit and monitoring the energy consumption norms.
- Carrying out various minor and major modifications.
- Adoption of technological advancement befitting to the old plant.
- Development of human resources.
- Creating safe, healthy and energy conscious working environment.
- Better housekeeping in the plant.
