Energy Management Policy:

Energy Policy

We are committed to continuously improve energy efficiencies in all our manufacturing processes:

To achieve our goal we shall

- Treat energy as one of the very vital inputs to our manufacturing processes.
- Measure energy consumption, benchmark and monitor against entitlements.
- Review and update entitlements at least once in a year.
- Continuously explore and implement energy conservation technologies and practices. This will include opportunities to use renewable energy.
- Enrich our experience and knowledge by actively participating in energy conservation forums to promote and exchange best practices.
- Promote awareness among all our employees and their families about the need for energy conservation.
