

Lucas-TVS Limited Padi (Chennai)

“ENERGY MANAGEMENT POLICY”

We are committed to reduce the Specific Energy consumption (Electrical units per Equivalent Starter Unit) for our products comparing to the previous year consumption

THROUGH

1. Maximize the Capacity utilization.
2. Fine tuning our Operations and Maintenance continuously to achieve the above goal.
3. Technology up-gradation with energy efficient processes and equipment's.
4. People involvement – suggestion, Small group activities, quality improvement team and work team.
5. Waste elimination – reduce, reuse and recycling.
6. Promote awareness in every employee through training, competition and factory visit.
7. Large cell formation.
8. Process changes.
9. Setting up a system to continuously monitor the progress.
10. Comply with Energy legislation and Environment regulation.
