## Energy Management Policy

February 22, 2005.

### ENERGY MANAGEMENT POLICY

We at RNPL are involved in production of high quality Newsprint and Writing & Printing Paper using waste paper as raw material thereby conserving natural depleting resource.

We are committed to demonstrate excellence in Energy Management Performance on a continual basis.

To achieve this, we are committed to ;

- 01) Improved Capacity Utilization
- 02) Upgradation of Process, Instrumentation & Utility/ Equipments for Energy Conservation.
- 03) Continuously review Specific Energy Consumption Norms and benchmark with the best in the Industry.
- 04) Energy efficient power generation equipment for replacement of old ones and achieve 100% self power generation.
- 05) Optimize consumption of natural resources, in particular Fuel, Water, Air & Electricity and wherever feasible, Reduce, Re-use & Recycle.
- 06) Carry out Internal and External Audits to identify areas of improvement.
- 07) To ensure that the New Projects are Energy Efficient.
- 08) Create Awareness among all employees for efficient use of Energy Resources.

(Executive Director)
