

Energy Conservation Policy

Energy is the key factor to Economic Development. In recognition to the same, Nalco emphasizes on energy conservation and cost effective utilization of energy in all its areas of operation.

Strategy:

- 1. Adopting energy efficient technology & to increase investment in all cost effective energy saving measures.*
- 2. To create awareness, within the company, of the need for benefits of energy conservation.*
- 3. To promote and provide for efficient use of energy while protecting human health, safety and environment.*
- 4. Efficiency improvement in energy conservation processes & utilities.*
- 5. Identifying the energy conservation opportunities & implementing actions to minimize avoidable losses.*
- 6. Continual effort for improvement in specific energy consumption in all operation.*
- 7. Conducting Energy Audits and Management Review to continue actions for improvement on sustained basis.*

Commitment:

We dedicate ourselves to ensure efficient use of energy in all our organizational activities in the field of Aluminium Extraction.
