

**CHAMBAL FERTILISERS AND CHEMICALS LIMITED
GADEPAN (KOTA)**

ENERGY MANAGEMENT POLICY

We, at Chambal Fertilisers and Chemicals Limited are committed to continuously improve the energy performance in all our activities and services to maximize reduction in energy consumption to become trendsetter for similar Fertilisers Plants in India.

Concern for cleaner environment and conserving energy resources for future generations without impairing productivity are the key drivers for energy conservation (ENCON). We shall conserve energy by:

- Efficient management and utilization of energy resources (like Natural Gas, Naphtha, LNG etc.) by updating hardware, better operational practices like reduce, reuse and recycle methods and employing more efficient and appropriate technology from time to time.
- Regular monitoring of Specific Energy Consumption and speedy implementation of ENCON Projects.
- Maximizing recovery of Waste and Low grade heat by adopting cost effective technologies.
- Fostering a culture of participation and innovation amongst stakeholders for continual improvement in energy conservation.
- Continuous evaluation of energy efficient and environment friendly technologies and encourage innovation.
- Carry out periodic internal and external energy audits to identify areas for improvement.
- Increased participation at all levels by creating awareness, training and encouraging the employee and residents participation through rewards.
- Sharing and enriching our experience on ENCON with other similar organizations and participating in benchmarking.

Date : 18th Feb, 2007
Place : CFCL, Gadepan.
