**ENERGY CONSERVATION POLICY**

Energy Conservation is continuous and on-going process. It has been a top management priority since last two decades.

The structured approach to achieve Excellence in Energy Conservation and management is based on

- ☛ Technological change to adopt energy efficient process
- ☛ Retrofitting and modification of existing process to make it more efficient.
- ☛ Minimize noise level through improved house keeping.
- ☛ Monitoring shop wise energy parameters at micro and macro level.

Bokaro Steel has established a well organized Energy Management Department since inception for sustained and systematic approach towards efficient utilization of energy.
