

INDO RAMA

ENERGY POLICY

We, at Indo Rama Synthetics (I) Ltd., commit ourselves to evolve, improve upon and sustain Energy Conservation to reduce cost of production for the benefit of organisation, nation and environment itself.

To accomplish this goal, we shall strive for :

- Improving our specific energy consumption
- Achievement of National and International bench marks for similar process plants
- Promoting use of renewable sources of energy
- Fostering a culture of participation and innovation amongst internal / external stake holders for continual improvement in energy conservation
- Using energy efficient and environment friendly equipment and technologies
- Propagating the message of avoiding wastage of energy to all users
- Promoting awareness amongst employees and contractors / vendors for shared responsibility towards energy management
