

## Energy Conservation Policy

MRPL is committed towards Energy conservation & optimization in its operations. Design features like Balanced draft furnaces, Flue gas analyzers, Draft Gauges, flue gas heat recovery systems, Heat exchanger trains for maximum heat recovery from hot streams, adequate heat insulations etc have been incorporated from the design/project stage itself. Energy consumption is given a two-pronged approach in MRPL. The first is to minimize losses by reducing flaring, capacity utilization and process optimization. The second is by implementing Energy conservation projects identified in-house across various process units.

The image shows a document with a yellow background and a globe at the bottom. At the top center is the MRPL logo, which includes the text 'ONGC' and 'मंगलूर पेट्रोकेमि कल्स लि. MRPL'. Below the logo, the word 'Vision' is written in red. The vision statement reads: 'To be a world-class Refining and Petrochemicals Company, with a strong emphasis on Productivity, Customer Satisfaction, Safety, Health and Environment Management, Corporate Social Responsibility and Care for Employees.' Below this, the word 'Mission' is written in red. The mission statement is followed by a list of six points, each preceded by a right-pointing arrow: 'Sustain leadership in energy conservation, efficiency, productivity and innovation', 'Capitalise on emerging opportunities in the domestic and international market', 'Strive to meet customers' requirements to their satisfaction', 'Maintain global standards in health, safety and environmental norms with a strong commitment towards community welfare', 'Continuing focus on employee welfare and employee relations', and 'Imbibe highest standards of business ethics and values'.

**Vision**

To be a world-class Refining and Petrochemicals Company, with a strong emphasis on Productivity, Customer Satisfaction, Safety, Health and Environment Management, Corporate Social Responsibility and Care for Employees.

**Mission**

- > Sustain leadership in energy conservation, efficiency, productivity and innovation
- > Capitalise on emerging opportunities in the domestic and international market
- > Strive to meet customers' requirements to their satisfaction
- > Maintain global standards in health, safety and environmental norms with a strong commitment towards community welfare
- > Continuing focus on employee welfare and employee relations
- > Imbibe highest standards of business ethics and values

The image shows a document with a white background. At the top center is the MRPL logo, which includes the text 'ONGC' and 'मंगलूर पेट्रोकेमि कल्स लि. MRPL'. Below the logo, the text 'MANGALORE REFINERY AND PETROCHEMICALS LTD.' is written in red, followed by 'ENVIRONMENTAL POLICY' in green. To the right of this text is the date 'October 1, 2003'. Below the title, the text 'We in MRPL, a Large Scale Petroleum Refinery commit ourselves to:' is followed by a list of seven bullet points: 'Achieve and sustain excellence in petroleum refining by producing quality products in an eco-friendly and safe environment by adopting sound / efficient technologies.', 'Continuously strive for prevention of pollution through efficient use of resources such as raw materials, water and energy.', 'Continual improvement of environmental performance by minimising air emissions, odour and effluent generation and better management of solid and hazardous wastes.', 'Comply with all statutory, regulatory and other applicable requirements.', 'Promote environmental responsibility and propagate the policy among all employees, concerned contractors and suppliers. Policy is also available to public.', and 'Sustain and promote green belt'. At the bottom, the text 'Reaffirmed by' is followed by a signature and the name 'R. Rajamani', 'Managing Director', and the date 'on May 23, 2006'.

**ENVIRONMENTAL POLICY**

October 1, 2003

We in MRPL, a Large Scale Petroleum Refinery commit ourselves to:

- Achieve and sustain excellence in petroleum refining by producing quality products in an eco-friendly and safe environment by adopting sound / efficient technologies.
- Continuously strive for prevention of pollution through efficient use of resources such as raw materials, water and energy.
- Continual improvement of environmental performance by minimising air emissions, odour and effluent generation and better management of solid and hazardous wastes.
- Comply with all statutory, regulatory and other applicable requirements.
- Promote environmental responsibility and propagate the policy among all employees, concerned contractors and suppliers. Policy is also available to public.
- Sustain and promote green belt
