

ENERGY POLICY

ENOUGH IS NOT ENOUGH FOR ENERGY CONSERVATION

TKES India, is committed to conserve use of Electrical Energy & Fuel

1. By using cost effective and energy efficient alternatives/ equipment and waste heat recovery methods in planned manner.
2. Optimising energy consumption at every stage of operation by
 - Effective operation and maintenance practices.
 - Setting energy norms for every stage of operation.
 - Periodic monitoring and review.
 - Training of employees in energy conservation practices.
3. By benchmarking the energy consumption norms with group and other similar companies.
4. By active participation and consultation with CII and other similar institutes.
5. By carrying out regular energy audits to identify areas for improvement.
6. Sustain energy efficiency gains by establishing and maintaining a management information system designed to support managerial decision making.

This will be achieved through dedicated team-work, participation and commitment from employees at all level and ensured by ENCON core group.
