

Energy Management Policy

Northern Railway plays a major role in the National economy by focussing on the task of addressing one of today's most vital areas i.e. "Energy Conservation".

Main Objectives:

- 1 To achieve lowest specific energy consumption.
- 2 To maximise use of Non-conventional sources of energy i.e. Solar Energy Products.
- 3 To utilize higher lumen lamps having increased efficiency for lighting in indoors and outdoors applications.
- 4 To replace non-efficient electric fittings/equipments.

Plans:

- 1 To manage efficiently the utilization of energy resources particularly Non-conventional.
- 2 To organise seminars in the area of Energy Conservation.
- 3 To carry out internal and external audits to identify area for improvements.
- 4 Enrich our experience on energy conservation by exchange of ideas with other organisations.
- 5 To promote awareness amongst all staff of our large Railway family .
- 6 Tendering, finalization and execution of Energy Performance Contracts through recognised agencies empaneled with BEE
