Alliance for an Energy Efficient Economy

AEEE¹ is an industry led association created for the specific purpose of facilitating dialogue and collaboration among India's Energy Efficiency (EE) industries and service providers.

Vision

An Energy Efficient India

Mission

AEEE's mission is to be a policy research and advocacy organization supporting the Government in working towards energy conservation and efficiency improvement in all sectors.

AEEE aims to

- Work towards reducing energy intensity and enhancing energy security through the adoption of clean energy and energy efficiency (EE) measure
- Set and uphold the highest standards of integrity and ethical practices among EE businesses
- Lead India's EE initiatives in research and development, market transformation, policy advocacy and implementation
- Inform member companies about Government policies and influence the Government for favourable policy changes
- Create a pool of trained Measurement and Verification (M&V) professionals

Promoting "An Energy Efficient India"

¹ AEEE was incorporated on 24th September 2008 as a Society under Societies Registration Act 1860 (Regd No: S/63470/2008 dated 24-09-2008) and was launched on 7th November, 2008 in New Delhi.

AEEE Programmes

- Provide M&V Training and Certification for Energy professionals. Partner: Efficiency Valuation Organization (EVO)
- Provide capacity building for central and state regulatory commissions for evaluating and monitoring Demand Side Management (DSM) Programmes. Partner: Lawrence Berkeley National Laboratory (LBNL)
- Organize Policy dialogues between EE industries and members of Indian Parliament on low carbon development path for India. Explore energy efficient technologies for supplying the underprivileged with water and energy. Partner: Oxfam India
- Assist the IT Sector in reducing energy expenditure by 10 percent in 3 years. Partners: NASSCOM and MAIT
- Organize an EE policy conference in India to provide a platform for academia, industry and policy makers to interact on EE Policy

Membership Benefits

- Enhance ability to influence policies affecting India's energy-efficiency market
- Information-sharing and strategic cooperation with other energy professionals
- Easier access to data and information in all aspects of energy efficiency for members and end-users
- Professional training in cutting-edge techniques, methods, marketing and technologies for improving energy efficiency

Membership Categories & Fees

AEEE Membership is open to companies and organizations committed to and interested in energy efficiency and is supported by member fees: Charter Member Contribution, Annual Subscription Fees and a one-time Admission Fee.

There are three membership categories: Charter, General and Associate.
